

NIKOLAY ANGELOV

Herlev Hovedgade 5d, 2730 Herlev, Denmark

Telephone number: +45 91 85 82 92, +359 898 241 345

E-mail: n.angelov@yahoo.com

Education

Danmarks Tekniske Universitet, Lyngby, Denmark
MSc in Computer Science and Engineering

September 2014 – Present

- **Course Highlights**

Development of Software Products	Technology, Economics, Management and Organization	User Experience Engineering
Database Systems	Software Engineering	Data Security

VIA University College, Horsens, Denmark
Bachelor ICT Engineering

August 2010 – December 2013

- **Course Highlights**

Software Development	Web and Database Design	Client/Server systems
Computer Architecture	Business Economics	English and Intercultural communications

- Full Transcript – [LINK](#)

High school “Vasil Karagyzov”, Yambol, Bulgaria

Sept.2005-May 2010

- Modules Included:
 - English and Russian Language & Literature
- High grade scholarship for the full length of study

Work Experience

“Max Mira” - local computer company – <http://maxmira.net>
Consultant/Tech support

I was mainly working with the new clients of the company. This could vary from people that want custom build computers or have something wrong with their home laptop. I have learned to deal with all kinds of people and seen most of the problems that people struggle with. We also had quite a few big companies for which we provided technical support from local networking to servers and database support and everything in-between. And from being ‘on the field’ and making the costly sometimes mistakes you learn to be responsible and dedicated enough to know what are you doing. You learn to problem solve on the fly and how valuable is to be able to think outside of the box when you don’t have all the resources in the world.

Internship

August 2012 – January 2013

“ESMIS” Bulgaria

One of Bulgaria’s most interesting non-major companies in the information technology in the business. With its activities spread over a number of fields including, but not limited to, owning and maintaining the only supercomputer (IBM’s Blue Gene) on the Balkans, software development and testing, hosting part of the Bulgarian e-government.

Mainly worked on an “Inspire” project (The Infrastructure for Spatial Information in Europe), the main goal of the project is to offer internet-accessible infrastructure of technologies and permissions to tie European geospatial information producers and users.

Projects

Kids party center **“Comics”** - <http://komiks-yambol.com>

Web application tailored for kids and their parents. This project was developed for a local company that opened their first party center for kids. Everything from design to back-end was done by me. One of the main requirements was to be mobile/tablet friendly and it was achieved mainly by using Bootstrap 3 and JavaScript.

Invoice system – <http://icodefish.com/projects/invoicepro>

This project was developed for an accountant that needed a simple way to issue invoices for a customer from another country which required some different currency exchange and basic math that his standard software didn't allow. It started as a simple Java application that did everything required but it had its drawbacks. That's why we moved it to the web with the help of some HTML/CSS and JavaScript/JQuery, so he could access it on every device all of the time. The project is currently in its 3rd phase which requires enabling it for everyone via paid subscription model and allowing other businesses to use it.

Telemedicine system **“REHAPP”** – <http://icodefish.com/projects/rehapp>

This project was developed for the Regional Hospital in Horsens / Hospitalsenheden Horsens (Midt) in which are performed numerous hip arthroscopy surgeries. The project was to design, implement and test a telemedicine system that will allow therapists and other health professionals to closely monitor and guide their patients during their rehabilitation, so as to allow a more efficient and fast recovery process and to make the patients feel more comfortable and safe during the rehabilitation.

For the rest of my work and more details you can see my **portfolio** at <http://icodefish.com>

SKILLS AND PROFICIENCIES

Computer Skills:

- Web stack: HTML, CSS, Bootstrap 3, JavaScript, JQuery, AngularJS, PHP, Laravel
- Programming languages: Java (Servlets, JSP, JNI, RMI, Java Applets), .Net(C#,ASP,ADO)
- Databases: Oracle, MySQL
- Design: Illustrator
- Experience with the AUP work methodology into the framework of SCRUM, CMMI

Language Skills:

- TOEFL (*Test of English as a Foreign Language*) certificate (94 points) 2010
- Languages spoken: English (fluent), Bulgarian (native), Russian (intermediate)

Free Time and Hobbies

Recent member of Fitness world gym at Herlev BIG, you can find me there in the morning trying to get more fit. Also I like photography, taking pictures of people and telling their stories through a captured moment on a photo. Photography also allows you to meet a lot of new people out of your normal social circles, not that much in Copenhagen though. I am a fan of comedy too. Love going to open mic nights and comedy shows. Last but not least I cook a mean steak and enjoy a nice glass of wine.
